I am a young professional with a Bachelor's degree in Biochemistry and a certification in Full Stack Flex Coding. I am seeking a position as a software developer. I am proficient in creative problem solving and team collaboration, as well as being quick to learn new skills and technologies.

Technical Skills

Frontend: ReactJS, Three and React Three, *HTML5*, *CSS*, *JQuery*, *Javascript*, *Bootstrap*, *TailwindCSS*

Backend: *MySQL*, *MongoDB*, *Express*, *Node*, *Vite*, *Handlebars*, *Webpack*

Projects

Portfolio | [Repo](#) | [Deployed](#)

React-Three Developer

- A professional portfolio of my projects and achievements using 3d rendering.
- This portfolio is a brief showcase of some of my front-end capabilities as a software developer.
- Tools/Languages: React, Three, Node, Vite, TailwindCSS

isGame: True | [Repo](#) | [Deployed](#)

Full Stack Developer

- A short platformer arcade game where users can compete for high scores.
- This application utilizes Phaser.io and Tiled for game development and is capable of sending user scores to a MySQL database for global display. My responsibilities include project management, game development and direction(sprite animation, physics, enemy logic, scene management, scoring, design music, sfx, etc.), and user/score data.
- Tools/Languages: Javascript, MySQL, Express, Node, Handlebars, CSS, Bootstrap, Phaser.io, Tiled

Duck Blog | [Repo](#) | [Deployed](#)

Full Stack Developer

- A satire tech blog for users to post bad tech advice.
- This solo project is a fully functioning tech blog, designed to have a silly, lighthearted theme. It supports user posts and comments, with the ability for users to update and delete posts of their choosing.
- Tools/Languages: Javascript, MySQL, Express, Node, Handlebars, TailwindCSS

Urban Info | [Repo](#) | [Deployed](#)

Data Management

- A simple web app where users can search socioeconomic data for different cities.
- This project is a successful demonstration of using a third-party API to receive data and the ability to aggregate this data for users to see. My responsibilities include managing API calls, search bar functionality, and data aggregation.
- Tools/Languages: HTML, CSS, Javascript, Bootstrap, JQuery, Python, Google Fonts, Teleport API

Work Experience

PPG*Feb. 2022 - Sept. 2022**Research and Development Chemist**Burbank/CA*

- *Efficiently researched material properties of aerospace products with industry experts and team members.*
- *Used strong logical and analytical skills to help my team advance the development of several different chemical technologies.*
- *Quickly mastered many laboratory techniques and used my expertise in training new team members.*

Education*University of California, Los Angeles**Dec 2020**Bachelor of Science, Biochemistry**University of California, Irvine**March 2023**Full Stack Flex Coding Certification*
